

183 - SW AGGRESSIVE CHEMICALS

Thermoplastic hose with hybrid steel wire reinforcement for very high pressure chemicals applications From 280 to 420 bar (4000 to 6000 psi)

FEATURES

Inner Tube

Polyamide PA12

Reinforcement

Two spiral layers + one braided layer of steel wire

Cover

Polyamide PA12 - black - non pinpricked - laser branding

Applications

Very high pressure aggressive chemicals systems requiring very high mechanical strength of hose and/or electrical conductivity - Applications requiring high chemical resistance to solvents and aggressive fluids such as two parts polyurethane injection foams - Injection moulding

Features

Polyamide type 12 tube construction - Combined reinforcement for high pressure requirements and increased mechanical properties increasing lifetime of the hose under very harsh working conditions - Black cover -Conductive

Description

High pressure hose with black cover - Due to particularly low humidity absorption of the tube this hose is particularly indicated for two parts PU foams injection systems (isocyanate and polyols) and very aggressive chemicals applications with increased resistance to abrasion mechanical strength and providing electrical conductivity - Check compatibility list for overview of resistance to chemical substances and gases.

Temperature Range

from -40 °C to 100 °C (-40 °F to 212 °F), limited to 70 °C (158 °F) for air and water based fluids

Standard Branding
